payflex big

PayFlex BIG is an integrated platform that allows you to manage your income and expenses without getting lost amidst a handful of accounts at different banks. **PayFlex BIG** saves you invaluable time and improves your efficiency.

Specially designed for organizations that are having a difficult time working with many banks and managing a myriad of bank accounts, PayFlex BIG (Bank Interface Gateway) saves you time and enables effective cash flow management with advanced reporting tools.

PayFlex BIG

All bank accounts under control

Allowing you to monitor all cash payment processes online and in a secure manner, PayFlex BIG (Bank Interface Gateway) will help you manage your cash flow from many different banks with ultimate ease.

Work with a self-learning software

With PayFlex BIG, you can enjoy the benefits of monitoring all your accounts at different banks on a single, consolidated platform. PayFlex BIG further stands out from competition with a differentiated offer, thanks to its self-learning, scalable structure and integration with all banks. With PayFlex BIG, your personnel will see all cash transactions on a single screen, eliminating the hassle to log in to the online banking applications of each and every bank you work with, each and every time they want to check the cashflow.

Get more skills under your belt

Next to expediting your account management, PayFlex BIG helps you acquire many novel competencies including more effective control of your finances. PayFlex BIG can;

- Easily integrate into existing ERP, CRM, e-commerce and collection software thanks to its special structure, and automatically project bank transactions to these systems;
- Help you view and analyze all realized cash transfers and account information within a given time window thanks to its advanced reporting tools;
- Easily display individual cash flows for each client over client management screens;
- Allow you to remotely monitor client & bank-based cash transfers and your organization's total assets on the management screen.

Prominent benefits of PayFlex BIG

All banks, single platform

Your finance personnel will not have to login to each online banking application one-by-one. You can save up invaluable time and assign different, critical tasks to these employees with freed-up schedules.

Account matching

Banka para transferini gerçekleştiren müşterileriniz otomatik olarak PayFlex BIG automatically identifies the client that has transferred cash to your account and matches and syncs this client with the individual transaction.

Around-the-clock

The follow-up of your cash transactions are not limited to office hours anymore. PayFlex is on-line 24/7 – including statutory holidays – recording, processing and matching all cash transfers.

Preventing user errors

The automatic follow-up feature of PayFlex BIG prevents unwanted user errors. The automation eliminates user-borne errors and ensures the accurate and secure processing of critical data.

Preventing unwanted transactions from scratch

PayFlex BIG boasts an advanced authorization matrix feature that allows you to grant your personnel varying levels of authority for each bank or account. This ensures the proactive elimination of potential security risks.

Easy integration

PayFlex BIG can easily be integrated with your existing ERP, CRM, e-commerce and collection software thanks to its specially designed structure, and automatically project bank transactions to these systems.

Sophisticated reporting tools

PayFlex BIG platform allows managers to monitor accounts on a real-time basis over the dashboard. This ensures you to report the ever-changing financial situation of your organization with the most up-to-date data and sophisticated criteria.

PayFlex BIG runs on blue-chip security standards

PayFlex BIG adheres to a range of modern security standards for the ultimate protection of your and your client's data. Modern security tools and procedures like IP restrictions, 256 bit SSL protection protocol, and HSM (Hardware Security Module) promote fortified protection against security threats. All new client accounts added to the system are stored in an encrypted format and cannot be accessed by any unauthorized personnel including the operations team. Role-based user authorization feature can instigate in-house access restrictions for further protection.

Meet other members of PayFlex Collection family
