

# AvioFlex Crew Check-in

Aircrews can now check in at airports with just a few taps on their mobile devices.

The AvioFlex Crew Check-in developed by Innova allows crews to check in and display all the necessary flight information on their mobile devices with just a few taps, saving valuable time at airports, especially during periods of high traffic. Thanks to the application, airlines have the ability to deploy their human resources much more efficiently, in addition to reducing lost time and thus preventing potential risks.

Ready for departure! It only takes a few seconds for crews to check-in...

# Innova Aviation Industry Solutions

Innova Aviation Industry Solutions overarches all processes mandated for operations of airline companies. You can enhance the efficiency of your decision support systems through enabling the lightening quick transfer of data from your fleet across numerous systems. The digitalization of these processes also spurs effective control mechanisms.

Innova products promote full integration between ground operations and aerial operations on the one hand, and between flight crew and back office systems on the other. All processes are digitalized and supported by Innova's flexible and strategic approach, endowing airlines with significant cost advantages.

## AvioFlex Cabin+

AvioFlex Cabin+ promotes the convenient management of the many preflight, in-flight and post-flight tasks to which Chief Flight Attendants should attend. Chief Flight Attendants are mandated to prepare a myriad of forms pertaining to numerous processes that take place at either one of these three stages and notify necessary parties properly. From supply provision to performance management, Cabin+ enables the easy management of all these processes over a tablet.

## AvioFlex LIFUS Manager

AvioFlex LIFUS Manager digitalizes the training assessment processes of both the cockpit and the cabin personnel. Personnel who have completed their training on the ground proceed to receive actual flight training and complete their evaluation processes over tablet devices.

## AvioFlex Ops Master

AvioFlex Ops Master is responsible from the 24/7/365 execution of all airline operations in a safe and flawless manner. Many operational tasks involve synchronous management of multiple factors and constitute the most critical workflows of airlines who schedule and carry out hundreds of flights a day. Ops Master is an authorization and reporting system which replaces emails and other operational approval systems. Enabling all flight operations to be viewed from a single center, this system relieves the burden of related units while digitalization paper-based processes and yielding additional cost benefits.

The preeminent benefits of Ops Master include the cultivation of corporate memory, raising operational awareness, establishment of process consistency, contribution to flight safety, curtailment of labor costs and promotion of fuel savings.

## AvioFlex Crew Duty

AvioFlex Crew Duty provides a mobile platform that connects cabin crew and ground. This platform facilitates their access to detailed information regarding their flights, either over a web portal or through their mobile devices. This system significantly improves the information flow between the cabin crew and helps with precise management of personnel operations.
