

Wall Pass Through Equipment DG-K, DG-S, DG-SY, DG-SD and DG-SK

NOYA INT. Wall Pass Through Equipment (WLTE) has been designed for sealing of RF cables and pipes passing through wall and floor penetrations in buildings, shelters (containers) and steel constructions. It provides sealing at IP 67.

Features

WPTE is produced from special rubber, which is highly resistant to harsh climatic conditions. Standards of 75 up to 90 shore of this rubber results in excellent sealing and provides IP 67 protection.

Cable Modules come in two different diameters (7/8' and 1/2') and with their specially designed frame they allow perfect fitting of cables for the commonly used diameters in GSM business.

Different sized modules can be used within the same frame to achieve the desired settings.
