BIG DATA PROCESSING, ANALYTICS AND FUSION SYSTEM (PORTIA)

A national advanced and highly customizable Data Fusion System Infrastructure capable of processing large volume data in real time.

- Evolving since 2014
- Readily available infrastructure

REAL TIME, ADVANCED ANALYTICS

- Statistical Analysis
- Time Series Analysis
- Social Network Analysis
- Machine Learning Algorithms for Modeling Predictions
- Classification and Clustering
- Anomaly Detection
- Data Fusion and Integrated Analytics

FUSION CENTER

Mission Reports

Plate Recognition

Target Location From
CDR Data

Airborne Imagery

Social Media

Credit Card Transactions

Identification from GSM
